Closing the Gap projekt

Ennek a EuroHealthNet által kezdeményezett projektnek a célja, hogy támogasson olyan projekteket és intézkedéseket, melyek az egészség állapotbeli különbségek csökkentését kívánják elérni és átadjon bevált, kedvező tapasztalatokat.

A projekt fő koordinátora a német BZgA (Bundeszentrale für Gesundheitliche Aufklärung – Szövetségi Központi Intézet az Egészségügyi Felvilágosításért) és anyagi támogatója a DG SANCO. A projekt saját honlapján (<http://www.health-inequalities.eu>) további információk érhetőek el a résztvevő partnerekről és az eddigi eredményekről.

Az OEFI részéről a témafelelős [Solymosy József Bonifác](#)

Célok hierarchiája

Globális – egészségállapotbeli különbségek mérséklése az EU-ban és az országokon belül

Specifikus – Nemzetközi tapasztalatcsere, közös adatbázis, tudás fejlesztés

Működési – helyzetelemzések, nemzeti politikák feltérképezése, legjobb gyakorlatok gyűjtése

Welcome to the European Health Inequalities Portal!

This portal is a unique space in which you can find recent examples of interventions and policies designed to reduce **health inequalities** in the countries of the European Union.

The portal is a host to:

- Database of Good Practice to Reduce Health Inequalities,
- Country Profiles listing the main policies, actors and tools developed to deal with health inequalities on a national level,
- EU Policy Section containing Case Studies that show how EU Policies and Programmes can affect health inequalities at the national level, and
- Relevant links related to the issue of health inequalities.

The Health Inequalities Portal is the go-to place to use when planning local projects, understanding the policy context of these interventions and/or conducting exploratory research in the field of health inequalities.

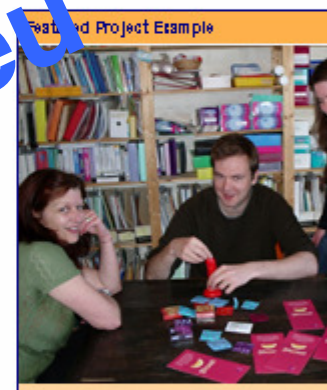

All content and information presented on this site are a result of the "Closing the Gap: Strategies for Action to Tackle Health Inequalities (2004-2007)" project developed by the Consortium of Partners for Equity in Health and co-funded by the European Commission.

(This project has received funding from the European Commission DG SANCO. The Commission takes no responsibility for text or information presented on this website.)

Project Lúsvári (Project Lúsvári)

A project delivering social and health-related activities (SRE) and promoting a group of vulnerable young people in community settings throughout North Wales.

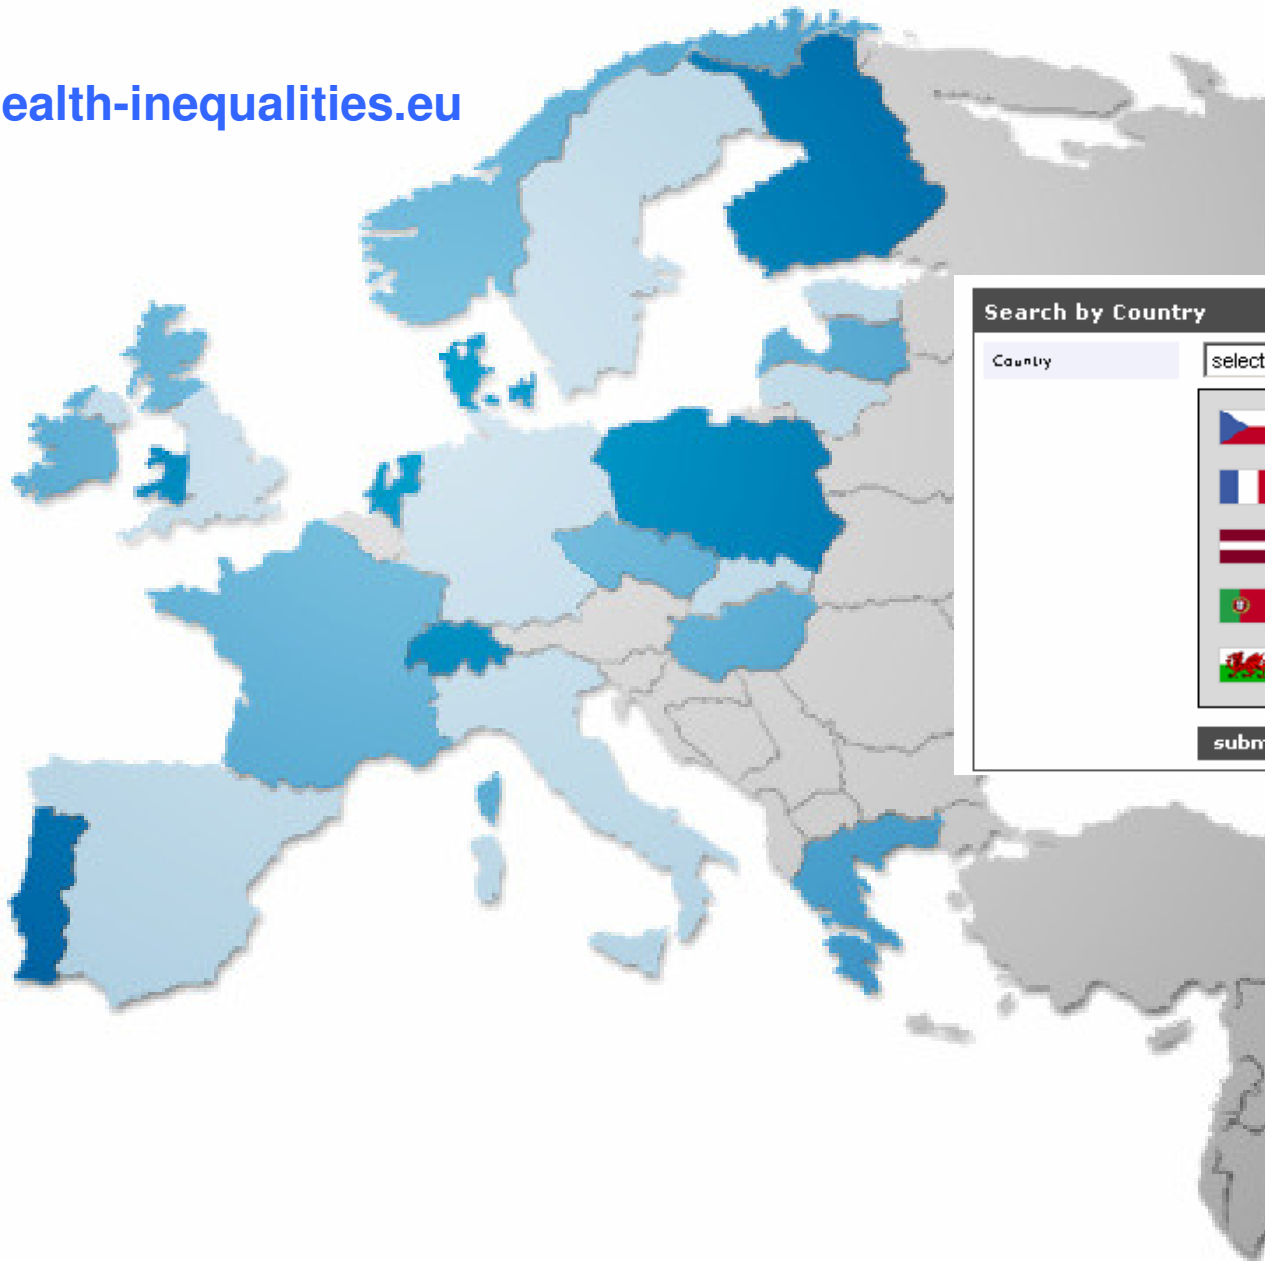

Health in All Policies (HiAP)

Health in All Policies (HiAP) is crucial to tackling health inequalities, by addressing the determinants of health. An expert conference on HiAP was held in London, Ireland on 20-21 Sep 2006. A book on Health in All Policies, published before the conference, served both as background material and as further reading on the subject. The first workshop focused on "Health Inequalities as a Key Social Challenge". [Click here](#) for the workshop background documents and conclusions. [Click here](#) for a report on the workshop, which contributed to the workshop conclusions.

Before any intervention is presented in detail in this directory it has undergone an extensive process of collection of information and quality-checking in collaboration between national partners, featured projects and scientific staff of the "Closing the Gap" project. For some interventions the presentation is not yet complete and is therefore not displayed in detail (Indicated by and the note: "Collection and processing of data still in progress"). If a detailed presentation of your selected intervention is not yet available, please check again later.

- Preventing disadvantages of the socio-cultural environment in early childhood**
(Helyi, preventív program – az organikus érettség felmérése és a megoldási lehetőségek ért)

The results of our survey suggest that the immaturity of the nervous system as a factor of development can have a role in failures at school and through this in the lack of success at the labour market, such as in the reproduction of disadvantages.

(Note: Collection and processing of data still in progress.)
- Health promotion clubs for elderly Roma people in three western counties in Hungary**
(Három megyét érintő civil kezdeményezés: idős romák egészségklubjai)

A Hungarian non-governmental organization established a health care club network of 66 clubs financed by an international organization. The program was located in three counties of the Western region of Hungary in 261 settlements for more than 2,000 elderly Roma people born before 1945.

(Note: Collection and processing of data still in progress.)
- Local Prevention Program: Summer Camp for Disadvantaged Children**
(Helyi program: Nyári tábor - felzárkóztató program hátrányos helyzetű gyermekeknek)

The objective of the camp was to offer stimulating environment for the children, to stir up their motivation for studying and to successfully complete the second examination in fall.

(Note: Collection and processing of data still in progress.)

National Level Policies

The National level Policies section of the annual provides an overview of the actual situation concerning actions to tackle health inequalities in the different European countries.

The part of the annual currently being developed, the information for the remaining countries will consequently be completed.

In addition to the national level surveys of the 10 national countries the overview analysis has been conducted and its final results have been published in EuroHealth magazine (EuroHealth, 11(2) 2014).

Country Profile

Hungary is one of the eight new EU member states of Central and Eastern Europe. Since it has become a democracy in 1990, it has followed patterns typical for a transition society and economy. Income inequality as measured by the Gini coefficient is 0.269 where 0 = perfect equality and 1= perfect inequality (United Nations Development Programme, 2004). The national public health programme (see section below) is based on the values of solidarity and the reduction of inequality. It appreciates the importance of socio-economic determinants of health and explicitly states that reduction of health inequalities within the population is the aim of country's health policy. Furthermore special attention is paid to health inequalities between the native Hungarian population and the Romany minority, who experience far worse health status and health outcomes. Due to evolving Hungarian social policy and the pressure from international organisations, the Roma health and welfare has been addressed and improving. Apart from inequalities between different socio-economic groups there are marked differences in health between the Hungarian regions. It is interesting to note that where the public opinion is concerned, the debate on health inequalities focuses on the provision of health services.

The background information to this entry was collected by the Hungarian project partner - József Solymosy of National Institute for Health Development. The following persons also contributed either by participating in the roundtable discussion or by providing their comments independently:

- Szilvia Ádám - Ministry of Youth, Family, Social affairs and Equal Opportunities - Department of civil affairs
- Éva Bondár - Ministry of Health - health economist
- Dr Judit Csehák - ex-minister of health
- Anna Csongor - NGO - head of "Autonomia" Foundation (focusing of social excluded people)
- Dr András Klinger - Central Statistical Office - advisor
- Dr Tamás Koós - NGO - Policy advisor Mobilitas - Foundation
- Dr Karolina Kósa - Debrecen School of Public Health, Debrecen, had of faculty
- Dr Andor Ürmös - Ministry of Youth, Family, Social affairs and Equal Opportunities - Department of Roma affairs
- Dr Anikó Romasz Zolcsákné
- Dr. Péter Horváth - Ministry of Youth, Family, Social affairs and Equal Opportunities - Department of Underprivileged People
- Dr Júlia Kishegyi - National Institute for Health Development (local health policy)
